A: From Acrobat > Help > Help and Knowledge > Activate product through phone or Internet Q: Binary.Printf is unsafe in a firebird/interbase connection with c#.net I'm facing the following problem : I try to develop a project that uses an Firebird database and my c# code is perfectly working but when I try to update my client using the web services I get the following error : Binary.Printf is unsafe in a firebird/interbase connection. I already tried to find a solution for it but every one is using a create a ADO.net connection with EntityFramework. You could help me please! Thanks A: The only way I know how to do what you are trying to do is by setting up a DB connection through Entity Framework. Entity Framework has a ton of features built into it, so you can easily create your "web services" in C# and then ba244e880a
