Drivers menu, you may find the drivers that are compatible with your hardware devices. . Driver Olivetti IBM X24 for Windows 10 64-bit Drivers, 8. Drivers menu, you may find the drivers that are compatible with your hardware devices. . Drivers Olivetti ibm x24 for windows 10 64-bit | Software Olivetti IBM X24 Drivers Windows 9x/ME/2000/XP 32bit, . Olivetti IBM X24 Drivers Windows 9x/ME/2000/XP 32bit Olivetti IBM X24 Printer drivers for Windows 8. Driver Olivetti IBM X24 for Windows 10 64-bit Drivers, 8. Olivetti IBM X24 Printer drivers for Windows 8. For the connection and the installation procedure of the Olivetti. Yarn.js????? ????? Open Yarn.js Q: strcat an int variable to a char array This is a part of a homework assignment, I can get my program to work without any problems except when I use strcat the program crashes. char szMsg[512]; int iMsg = 0; printf("Enter the message that you would like to log: "); scanf("%d", &iMsg); strcat(szMsg, iMsg); printf("%s", szMsg); When iMsg is a number I can log it fine, but when iMsg is an integer "49" it crashes. I have no idea what this number is, I used a debugger and found out that the line where it crashes happens is strcat(szMsg, iMsg);. A: You are using wrong format specifier in scanf call You need to use %d for int. "%d" for int and "%c" 2d92ce491b
