Download

Create unlimited app catalogs with one-click! Because it supports 8 popular file formats, including mp4, mkv, m2ts, avi, mov, 3gp and mp3, it can be used to download any format video file. Furthermore, it is also a video downloader app. Sure to Download Any Video File Moreover, it can even download videos from popular streaming services, such as Vimeo, Dailymotion, and Soundcloud. So you can check out the videos you want to download with a single click. By using its powerful search function, you can find your desired videos very easily. How to Choose the Best Movie Downloader App? 1. Powerful File Formats Before downloading any video file, you first need to know the video format, audio format and size of the file. If you are not familiar with the format, you might get a blank screen or crash your video downloader app. In the end, you will download a wrong file. However, you can get the right video format by using an excellent video downloader app. It supports all the most popular formats, such as mp4, mkv, m2ts, avi, mov, 3gp and mp3, which makes it an all-in-one movie downloader app. 2. Up to 50 Downloads Per Day Sometimes, you might need to download a video file more than one time. However, there is no proper movie downloader app that can download a video more than one time. That is to say, it can only download the same video file once per day. However, by using a powerful movie downloader app, you can download a video file more than once per day. For example, you can have 50 downloads per day. So you can easily download any video file you want to enjoy whenever you want. 3. Speed and Convenience Although most of the popular movie downloader apps have powerful functions, but they are usually slow and not convenient. In this case, it will increase the downloading time, or even make the app crash. So it is not suitable for a real-time downloader. However, your video downloader app should be fast and convenient. So you can easily choose it by the downloading speed. Some powerful apps can download video files in seconds, but some others need about 5 minutes to download a video file. 4. Free and Open-source
